

Long agent trace (message roles known to the serving layer)

Role-blind eviction (sink + recent)

*agent-critical middle state can be deleted*

Structure-aware mixed-precision cache

*every position kept; precision follows role*

Under a matched budget the arms differ only in which pages they protect (eviction) or demote (mixed precision).

*Conceptual diagram, not measured data. The tagger reads prompt metadata only — never future attention or benchmark answers.*
